(54) Title: LOW-VOLTAGE IC-CIRCUIT

(57) Abstract: The invention regards an IC-circuit construction where the circuit is partitioned into power consuming sub-circuits (1,6) and where ground voltage level (VHH) in the power supply of a first sub-circuit (1) is used as the supply voltage level in a second sub-circuit (6). According to the invention a voltage control circuit (4) comprises a first buffer capacitor (10) coupled in parallel over the supply voltage level (VBB) and ground voltage level (VHH) of the first sub-circuit (1) and a second buffer capacitor (11) coupled in parallel over the supply voltage level (VHH) and the ground voltage level (GND) of the second sub-circuit (6), whereby means for maintaining a uniform voltage drop over the first (10) and the second (11) buffer capacitor comprises at least one bucket capacitor (20,21,22) which is alternately coupled in parallel over the first (10) and the second (11) buffer capacitor through a switching system controlled by a toggling signal.

INTERNATIONAL SEARCH REPORT

International Application No
PCT/EP2004/004433

A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 H02J7/00 G05F3/02 H03L5/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 H02J G05F H03L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
------------	--	-----------------------

X	US 6 121 751 A (MERRITT LAUREN V) 19 September 2000 (2000-09-19) figure 1 -----	1-3
---	--	-----

☐ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family
